

PRESS RELEASE

Integrated Land Mobile Radio, Voice Dispatch, and Mapping Solution Now Available for Public Safety Dispatch Environments

Ottawa, Canada, August 17, 2015 – The capabilities of the Tait Communications P25 Land Mobile Radio (LMR) platform have been extended through collaboration between Tait Communications, Avtec, and Tallysman Wireless—three leading suppliers of LMR solutions. This collaboration has delivered a new solution for public safety customers called EnableLocation. The solution enables Avtec’s Scout™ radio console system to receive and display voice, mapping, and automatic vehicle location (AVL) data from Tallysman’s TruFleet™ software transmitted by Tait P25 radios.

EnableLocation was developed to meet the demands of our public safety customers who require the enhanced functionality of a wireline connection for radio dispatching.

The Avtec Scout console offers direct radio over IP (RoIP) connectivity to the Tait P25 radio system, as well as to the Tallysman TruFleet application. This allows users to contact mobile subscribers for position, to send and receive free form text or status messages, and to perform voice dispatching with advanced services like encryption and emergency alerting via the Scout console.

“Collaboration is the key to delivering innovative solutions and revolutionizing the industry,” said Tallysman’s Director of Wireless Infrastructure Products, John Seymour. “We have established a close, trusted relationship with Avtec and Tait Communications and look forward to complementing each other’s strengths and delivering value-added solutions to the industry.”

Added Avtec Director of Partnerships and Alliances Michael Ridge: “The functionality of the integrated Tait, Tallysman, and Avtec solution combines the strengths of three separate offerings into a software solution that is simple to install, easy to use, and keeps pace with our customers’ demanding work environments.”

“The Tallysman, Avtec, and Tait partnership and testing program demonstrates our joint commitment to leading the industry in providing comprehensive communication solutions,” said Ellery Hurn, product manager, partner solutions at Tait Communications.

Those attending the Association of Public Safety Communications Officials (APCO) show, which concludes Thursday, can learn more about this by visiting Avtec at booth No. 955 or Tait Communications at booth No. 433.

About Tait Communications

Our clients protect communities, power cities, move citizens, harness resources and save lives all over the world. We work with them to create and support the critical communication solutions they depend on to do their jobs. Digital wireless communication forms the central nervous system of everything we do. Around this resilient, robust core we design, develop, manufacture, test, deploy, support and manage innovative communication environments for organizations that have to put their total trust in the systems and people they work with.

We’ve worked hard to develop genuine insight into our clients’ worlds, and have pursued engineering, operational and services excellence for more than 40 years. This understanding, and our belief in championing open-standards technology, means we can give our clients the best possible choice and value to achieve the human outcomes they’re driven by.
