

🎯 TW5794 Precise Heading SDK

You want to know exactly where your drone or robot is, and where it is going, without second-guessing your design.

Calian's TW5394/5794 Smart GNSS Precise Heading Antenna is the Plug and Play solution to Precise Heading for Robotics.

The TW5794 Precise Heading SDK is the best way to get started. It includes a TW5794 Smart GNSS Precise Heading Antenna with USB to connect into your PC. TruPrecision software simplifies the User Interface to the antenna's GNSS receiver, and provides extras such as logging tools, GNSS signal strength graphs and tools for sharing RTCM between base and rover antenna pairs across the internet. It also includes a 60 day complementary access to ublox' PointPerfect® GNSS Augmentation Service, with an easy process for quickly applying the corrections to your SDK antenna.

🗺️ TW5794 Precise Heading SDK includes:

- Calian 33-5794-19-10-0S-PC0 Smart GNSS Precise Heading antenna with USB
- Calian TruPrecision Application for Software Development and Verification
- 60-day trial subscription to the PointPerfect augmentation service
- Ordering Information: 33-TP5794SDK-1TW5794 Precise Heading SDK

The TruPrecision SDK application is a Windows service which provides an autonomous connection to stream PointPerfect IP corrections and decryption keys to the TW5794 Smart Antenna via the the USB, which also provides a Virtual COM Port to allow customers to connect their existing applications to the Tallysman TW5794 Smart GNSS Precise Heading Antenna high precision “corrected” position data output. The position data may be either NMEA or UBX formatted messages. ROS2® Drivers are available to integration with ROS2 open framework projects.
