

## PRESS RELEASE

### **Tallysman Wireless Announces Strategic Partnership with Teldio**

*Delivering value-added AVL solutions to the Digital Two-Way radio industry*

**Ottawa, Canada, July 5th, 2015** – Tallysman Wireless™ Inc., a leading provider of high performance, high quality RF and GNSS components, and Telematics solutions for two way radio systems, today announced a strategic partnership that will see Teldio become an authorised distributor of Tallysman's Trufleet™ GPS tracking and fleet management application for MOTOTRBO™ radio networks.

This partnership with Teldio will provide easier access to Tallysman telematics and tracking products for new and existing Teldio end customers and better serve both companies' digital two-way channel partners.

Together, Tallysman and Teldio are committed to delivering value driven solutions customized for the transportation, education, utilities, and other sectors. Both organizations provide complementary services in the two-way radio industry. The combined strength of Tallysman and Teldio will help deliver a comprehensive range of solutions to more channel partners throughout North America.

"Collaboration is a key building block to delivering innovative solutions and revolutionizing the industry," said Tallysman's Director Wireless Infrastructure Products John Seymour. "We have established a close, trusted relationship with Teldio and look forward to complementing each others strengths and delivering value-added solutions to the industry."

"We look forward to working with Tallysman and adding TruFleet™, their GPS fleet management technology to Teldio's suite of applications," said Teldio Director of Sales, Jeff Smith. "Our channel partners and end customers will benefit from their state-of-the-art GPS application which features built-in fleet management functionality and alarming notifications."

"Teldio has great in-depth knowledge of MOTOTRBO™ digital radio networks and is well positioned to support installation of Tallysman Systems on both large and small MOTOTRBO™ radio networks" said Gyles Panther, President of Tallysman, "This will ensure implementation is well managed and a positive experience for Teldio's end customers, and also provide additional opportunities for MOTOTRBO™ channel partners".

#### **About Tallysman Wireless™ Inc.**

Tallysman Wireless™ Inc. is a developer of efficient Telematics and tracking systems applications for professional digital two way radio networks. Tallysman systems are easily installed, stable and simple to use, and provide effective fleet management with extensive reporting to improve fleet utilization and reduce costs.
