

A TIME AND PLACE *for everything*

## **PRESS RELEASE:**

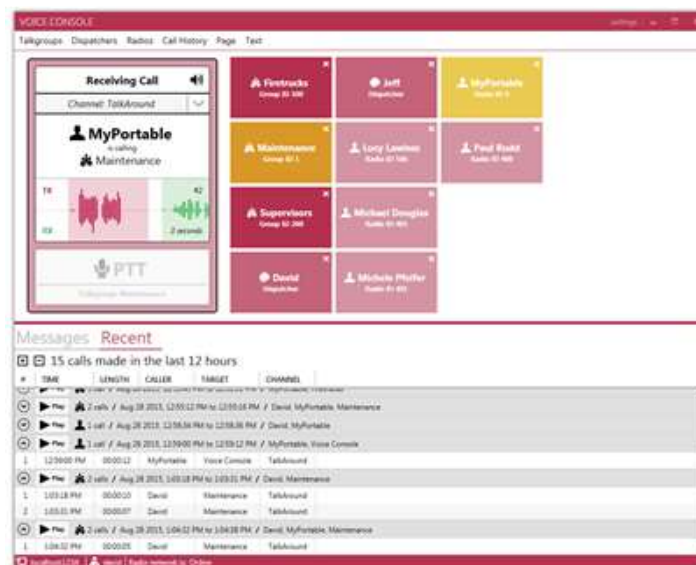

Ottawa, Canada, 28th October, 2015

***Tallysman introduces “TruDispatch” an IP based Voice Dispatch console for MOTOTRBO™ Systems. It provides Fleet Operators with the tools to increase dispatch operational efficiency and maintain audit records of all voice communications.***

An intuitive Voice Client interface delivers all of the dispatch capabilities you expect including customization of the user display to quickly access your favourite individual or call groups, quick replay of recent calls to maximize user efficiency, Text Messaging and Emergency call notification.

The TruDispatch Console supports multiple voice clients and provides unlimited audio and event logging as well as immediate audio playback. All TruDispatch clients have instant recall of the last 12 hours of calls and extensive archival search capabilities for auditing of all voice communications.

The IP based architecture enables fleet dispatchers to operate from anywhere in the world and can be used in situations where a dispatcher has no radio coverage but needs to work with several radio sites that are not connected.

John Seymour, Director of Data products comments, “The TruDispatch voice console can be run on the same server as our TruFleet AVL application enabling MOTOTRBO dealers to offer an integrated Fleet Management solution to meet the most demanding client communication needs”.

A TIME AND PLACE *for everything*<sup>®</sup>
